## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities:

The disclosure is objected for missing a co-pending U.S. patent application Ser.

No. in Para [0001].

Appropriate correction is required.

### ***Allowable Subject Matter***

2. Claims 1-4 would be allowable after the objected discloser is corrected.

The following is an examiner's statement of reasons for allowance:

The allowable subject matter in claim 1 pertain a method of positioning the active edge of a clock signal within the unit interval of a data signal, the method comprising the steps of: (a) measuring in terms of a  $\Delta T$  the unit interval of the data signal by: (a1) applying the data signal to a delay line having taps  $\Delta T$  apart, the overall delay line being at least as long as the unit interval; (a2) latching the logical values appearing at consecutive taps  $2\Delta T$  apart upon a transition in the logical value of the data signal; (a3) generating a measured unit interval signal indicating the length of the unit interval in terms of the number of consecutive latches having the same logical value latched in step (a2); (b) delaying a clock signal in units of  $\Delta T$  and by a selected amount; (c) measuring in terms of  $\Delta T$  where in the unit interval the delayed clock signal of step (b) exerts an active edge be: (c1) applying the data signal to a delay line having taps  $\Delta T$

Art Unit: 2611

apart; (c2) latching the logical values appearing at consecutive taps  $\Delta T$  apart upon the active edge of the delayed clock signal; (c3) generating a clock phase signal indicating, in terms of a number of consecutive latches, where in the unit interval a transition occurred in the logical values latched in step (c2); (d) determining the selected amount of delay of step (b) according to the values of the measured unit interval signal of step (a3) and of the clock phase signal of step (c3). The aspect of claim 1 is the above neither anticipated nor obviated by the prior art of record.

Claims 2-4 are depend on claim 1

Therefore, claims 2-4 are allowable for the same reason as for claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

2. This application is in condition for allowance except for the objection to the disclosure above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).
